- Change Management
- Data-Driven Decision Making
- Performance Analysis
- Executive Reporting
- Business Requirements Documentation
- Problem Solving

Data Analytics & Business Intelligence

- SQL Query Development
- Data Cleaning & Transformation
- Dashboard Development & Data Visualization
- Reporting Automation
- Data Validation & Quality Assurance
- KPI Monitoring & Performance Measurement
- ETL Fundamentals
- Workforce Analytics
- Operational Reporting

Tools & Technologies

- SQL
- Python
- Power BI
- Tableau
- Looker Studio
- Microsoft Excel
- Git/GitHub

PROFESSIONAL EXPERIENCE

Nairobi City County Government – Governor’s Delivery Unit

Data Analytics Intern

January 2025 – December 2025 | Nairobi

- Led reporting transformation initiatives across 17 sub-counties by digitizing manual reporting processes into structured workflows, improving reporting efficiency, data accessibility, and organizational decision-making.
- Cleaned, transformed, validated, and analyzed large government datasets using SQL and Python to improve data quality and support evidence-based decision-making.
- Developed and maintained interactive Looker Studio dashboards that enabled management and stakeholders to monitor service delivery performance, project implementation, and operational KPIs.
- Independently managed reporting workstreams, coordinating data collection, validation, dashboard development, stakeholder engagement, and performance monitoring activities.
- Conducted business analysis to identify reporting gaps, operational challenges, and opportunities for process improvement.
- Facilitated bi-weekly stakeholder review meetings, presenting analytical findings, trends, risks, and recommendations to senior leadership and departmental teams.
- Produced executive reports, analytical summaries, and performance reviews that informed strategic planning and resource allocation decisions.
- Automated recurring reporting processes, reducing manual effort and improving reporting accuracy and turnaround time.
- Collaborated with cross-functional stakeholders to gather business requirements and translate organizational needs into actionable dashboards and reporting solutions.
- Conducted user training, knowledge transfer, and change management activities to support adoption of reporting systems and digital data collection tools.

Unimax Company Limited

Technical Support Engineer

February 2024 – December 2024 | Nairobi

- Supported client-facing contact center operations through system administration, performance monitoring, and business reporting.
- Generated and analyzed workforce performance reports, SLA reports, operational KPIs, and service metrics to support management decision-making.
- Monitored SLA compliance and provided recommendations to management on performance improvement initiatives.

- Conducted requirements gathering sessions with clients to configure and customize systems according to business objectives and operational workflows.
- Facilitated user training sessions and knowledge transfer workshops, improving system adoption.
- Investigated technical and data-related issues, conducted root cause analysis, and implemented solutions to minimize operational disruptions.

DATA ANALYTICS PROJECTS

1. Reporting Workflow Automation – Green and Clean Initiative

Business problem: Manual and fragmented reporting of environmental and cleaning activities which leads to delayed, inconsistent, and non-data-driven decision-making.

- Designed structured data collection workflow from Google Forms to Google Sheets and Looker Studio.
- Standardized reporting templates to improve data consistency.
- Automated reporting pipeline to reduce manual processing.
- Developed dashboards for monitoring initiative performance metrics.

2. Nairobi County Bursaries & Scholarship Allocation Dashboard

Business problem : Lack of centralized visibility into bursary allocations, limiting transparency and tracking of funding distribution.

- Cleaned and structured multi-year bursary and scholarship allocation data using Excel.
- Standardized inconsistent school, ward, and student records to improve data accuracy.
- Built an interactive dashboard in Looker Studio to track allocations by year, school, ward, and individual student.
- Visualized funding trends, allocation distribution, and repeat beneficiary patterns.
- Enabled transparent reporting and supported data-driven decision-making for stakeholders.

EDUCATION

Bachelor of Science in Software Development - KCA University (2019-2023)

Grade: Second Class Upper Division
